

PRODUCT OVERVIEW

Reel-in-a-Box

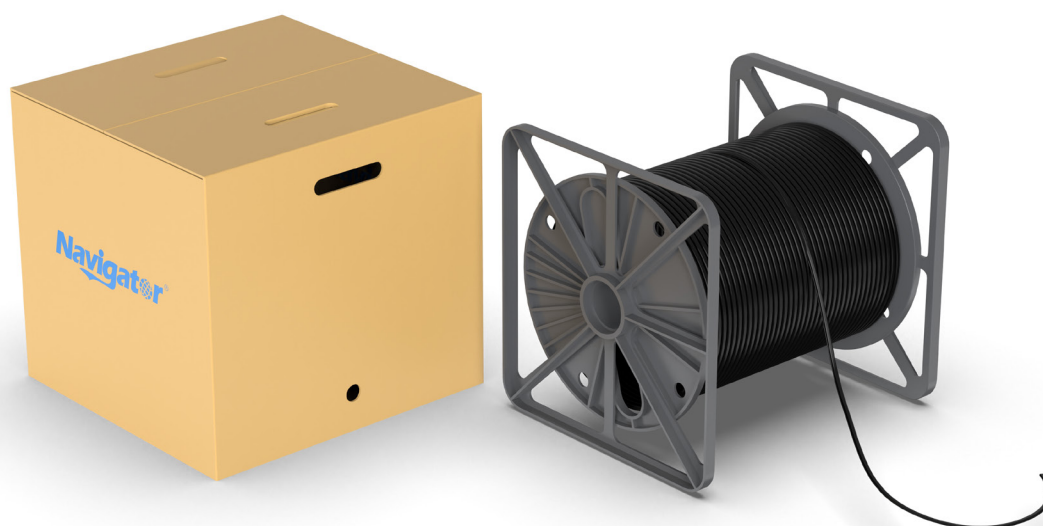

Simplifying Drop Cable Installation: Reel-in-a-Box

The last mile of fiber deployment demands simplicity, precision, and protection. Reel-in-a-Box by Navigator® is engineered to deliver exactly that. This compact and robust packaging solution ensures your drop cables are always ready for seamless, tangle-free deployment.

At the heart of our design is a specially engineered, free-spinning reel nestled within a durable corrugated carton. This system singlehandedly guarantees smooth cable dispensing without needing any other extra equipment, eliminating snags and kinks for faster, cleaner installs. The compact size of the carton makes it effortlessly portable, easily carried by hand onto any worksite – from tight urban spaces to remote rural locations. Reel-in-a-Box is also optimized for bulk shipment, maximizing pallet space to streamline your logistics. The sturdy carton provides superior protection, shielding drop cables from mechanical impacts and environmental exposure, maintaining pristine fiber cable integrity from warehouse to wall.

FEATURES:

- *Smooth Dispensing: Tangle-free, kink-free deployment.*
- *Highly Portable: Easily hand-carried to any job site.*
- *Efficient Logistics: Optimizes bulk shipping and storage.*
- *Enhanced Protection: Guards cables from external damage.*
- *Universal Compatibility: Works with all types of drop cables.*
